FINDING PLACES ON YOUR GLOBE

Although a globe is spherical, with no beginning or end, there are two main reference lines from which all distances and locations are calculated. One is the equator, running east and west around the middle of the globe, dividing it into two equal halves. The other is the prime meridian, an imaginary line running from pole to pole and cutting through Greenwich, a section of London, England. Both of these lines are 0° and the globe numbering system starts at the point where they intersect. All lines running east and west, parallel to the equator, are called latitude lines. They are sometimes referred to as parallels because they are parallel to each other. Latitude lines are shown at 15° intervals north and south of the equator. The lines running north and south from pole to pole are called longitude lines, sometimes referred to as meridians. Longitude lines are numbered along the equator on your globe at 15° intervals east and west of the prime meridian at Greenwich. Using these lines a person can locate any place in the world. For example New Orleans is located at 30N latitude and 90W longitude.

RAISED RELIEF/EMBOSSSED GLOBES

RAISED RELIEF/EMBOSSSED GLOBES illustrate land features by molding shapes on the surface of the globe. Most raised relief globes feature subtle relief, allowing the user to better visualize mountain ranges and plains by attempting to show elevations and depressions.

GLOBE LEGEND

A **GLOBE LEGEND** is a scale and visual explanation of the symbols used on the map. Because globe and map symbols' meanings vary from region to region, a clear and concise legend is critical for conveying the distinctive characteristics of the globe.

POLITICAL VIEW GLOBES

POLITICAL GLOBES are designed to show governmental boundaries of countries, states, and counties, the location of major cities, and they also include significant bodies of water, deserts and mountain ranges.

TOPOGRAPHICAL VIEW GLOBES

TOPOGRAPHIC GLOBES are detailed, accurate graphic representations of features that appear on the Earth's surface. A topographical globe will depict deserts, plains, rain forests and mountain ranges.

TWO WAY MAPS

Many illuminated globes feature **TWO WAY MAPS**. These are maps that reveal another view of the world when the globe is illuminated. For example, a two way map may show a topographical view when un-illuminated and a political view when illuminated or a political view when un-illuminated and the constellations in the sky when illuminated.

TIME DIAL

Most globes have a **TIME DIAL** loosely capped over the north pole that is divided into twenty-four equal parts, each representing one hour (or one meridian). A time dial allows viewers to calculate the different time zones on a globe.

MERIDIAN (SEMI OR FULL)

The ring that encircles half of the globe (**SEMI-MERIDIAN**) or the entire globe (**FULL MERIDIAN**), normally attached to the globe on both poles and the base.

JUPITER

MODEL #	GLOBE DIAMETER	RAISED RELIEF	RECLAIMED PAPER FIBER
85405	12" / 30cm		

Get to know the "gas giant" with this stunning 12" desktop globe, the first ever high-resolution globe of its kind of this planet. Developed by the staff of Astronomy magazine and Björn Jónsson, an Icelandic software developer and expert on converting spacecraft image data into stunning planetary maps, this globe was produced using images from the Cassini and Juno spacecraft. Jónsson first created a global map of Jupiter using only Cassini data way back in 2005. But in May 2018, he updated his original global mosaic with the latest Juno data, which added data on the coverage of Jupiter's poles. The globe identifies 18 features, including The Great Red Spot, Oval BA, and the distinct bands of fast-moving clouds that run parallel to the equator. Each globe is made of long-lasting durable plastic with just a single seam between hemispheres and comes with a clear acrylic display base and bonus informational flyer.

This is the world's most detailed globe, abounding with over 28,000 place names. Most globes list no more than 4,000 locations, but at 32" across, this virtuosic achievement in cartography holds enough detail to spark any geography lover's imagination, from the Scottish county town of Ayr to the Isthmus of Kra in Thailand to Panama's Las Perlas Archipelago. This floor-standing globe becomes a focal point of any library or captain's quarters, grandly cradled in a handcrafted mahogany frame that has been rubbed to a lustrous walnut finish and rolls smoothly on four casters. Our artisans spend more than 40 hours to complete each globe ball, the hand cut and hand-applied topographic map radiates with its ocean and six color political demarcations even when not illuminated from within by its internal 75-watt bulb. The solid brass meridian has been crafted and calibrated to show each degree. The blue globe map contains continental shelves which shows the extended perimeter of each continent and associated coastal plains. Plugs into AC. Hand-made in the United States.

Since ancient times, the column has stood as a functional and decorative standard. Designer Tom Torrens has fashioned an all-metal globe base reminiscent of that form. Crafted to reflect modern design. History, architecture, and culture come together in a unique way with this 16"/40 cm antique-ocean globe.

OBELISK FLOOR GLOBE

MODEL #	GLOBE STYLE	GLOBE DIAMETER	RAISED RELIEF	RECLAIMED PAPER FIBER
22728	ANTIQUE	16" / 40cm		

Frank Lloyd Wright (1867–1959) is widely considered to be America's greatest architect. He amazed the world with his architectural ingenuity and designs. His vision encompassed the buildings and residences he designed as well as their landscaping, art glass, furniture, lighting and floor covering - to create a unified whole. An adaptation of one of Wright's vase designs developed in 1929 for Leerdam Glassfabrik in Germany. The Obelisk stand is made of solid maple and cherry hardwood.

WRIGHT FLOOR GLOBE

MODEL #	GLOBE STYLE	GLOBE DIAMETER	RAISED RELIEF	RECLAIMED PAPER FIBER
22712	ANTIQUE	16" / 40cm		

This globe stand is an authentic reproduction from a drawing found in the Frank Lloyd Wright Foundation archives. It is an unidentified concept for one of the Prairie Homes that Wright designed in the early 1900's. The only marking on the drawing is in his handwriting and says, "Something like this." The proportions, and interpretation, of the drawing were calculated based on the scale of other drawings from this time period.

HEXAGON

MODEL #	GLOBE STYLE	GLOBE DIAMETER	RAISED RELIEF	RECLAIMED PAPER FIBER
31821	ANTIQUE	12" / 30cm		

Frank Lloyd Wright's overall concept for his buildings included the integration of the interior furnishings. In 1952, he developed a series of hexagonal metal chairs, tables and other furniture for the H. C. Price Tower in Bartlesville, OK that coordinated with the geometric shape of the building. Adapted from the hexagonal hassock design, this globe stand exemplifies the three Organic Elements used by Wright throughout his lifetime. The metal base is triangular, the wood globe support is hexagonal, and the globe is circular.

SAN MARCOS

MODEL #	GLOBE STYLE	GLOBE DIAMETER	RAISED RELIEF	RECLAIMED PAPER FIBER
31819	ANTIQUE	12" / 30cm		

In 1928, Frank Lloyd Wright began creating drawings for the San Marcos in the Desert Hotel that was to be located in Chandler, AZ. The project was never completed due to the 1929 stock market crash, but the building design and the interior renderings contain a variety of interesting furniture and decorative features. The composition of this globe stand is adapted from the 60 degree angle legs and hexagonal top of a small accent table designed for the Dining Pavilion which was to be bordered by garden terraces of the San Marcos in the Desert Hotel.

TRADITION & COMMITMENT TO QUALITY

Since its beginning in 1930, Replogle has become one of the world's largest manufacturers of globes. From handcrafted masterpieces to educational globes, Replogle has taken pride in manufacturing **THE FINEST GLOBES IN THE WORLD.**

Replogle Globes Partners are dedicated to maintaining and improving the Replogle Globes tradition of quality products and services. Our customers are the most important part of our business and we look forward to continue to service all the fine organizations that carry Replogle Globes.

Our mission of **A GLOBE IN EVERY HOME** is founded on globes being both a source of wonder and a way to help people make sense of their world. Replogle Globes Partners is committed to this mission and continuing the tradition of producing the highest quality globes in the world.

✕ **LEAN MANUFACTURING** This philosophy allows Replogle to improve quality but it also enables us to reduce the Carbon Footprint within our factory. It has reduced the amount of energy usage through the reduction of machines and materials transportation.

✕ **PAPER & FIBER PRODUCT RECYCLING** Replogle began allowing outside companies to pick up our excess paper & fiber. Replogle recycles approximately 340 tons of paper and fiber materials per year.

✕ **PLASTIC RECYCLING** Replogle utilizes some post industrial reclaimed plastic in its manufacturing processes. The unused plastic is gathered from the manufacturing line and delivered to our in-house grinding room. There the excess materials are reformed into pellets and redistributed to our machines.

✕ **PURCHASING** The Replogle purchasing department continues to source eco-conscious products for use in our daily production, office administration and maintenance departments. Currently, all of our production 'press-craft' models are made from post-consumer reclaimed paper fiber, making over 75% of our total globe output manufactured from earth friendly material.
